

## Attention Homeowners!!

If you haven't already heard: We've had a grass fire here in the neighborhood recently. Luckily there was no major property damage and the local VFD was able to put out the blaze. As a preventative measure, Frank Schwake was kind enough to mow the road frontage along all of our properties to help cut down on excessive brush and fuel for fire (as you may have noticed). The Board has decided that this would be a beneficial use of the Association's resources and has voted to make this, at least for now, an annual event in an effort to safeguard all of our investments in our neighborhood. Anyone interested in bidding the project in the future may submit their proposals to our P.O. Box. As far away from town and the fire department as we are, it's important that we all take the time to ensure that we are aware of and try to reduce all fire hazards, and, of course, abide by all local fire regulations. It is even more important that we are prepared for those instances- like the recent event- that cannot necessarily be prevented, and do our best as a community to be prepared for them when they do happen.
